

GENERAL ADVICE:

Anilox Roller Guidance

Fine text and process work 180-200 lines per inch (72-80 line per cm)

Large text, Metallics and optimum opacity 100-165 lines per inch (40-66 line per cm)

Metallic Silver

To obtain optimum durability, the Metallic Silver (EPFLX-SILVER-877C) must be used as a two pack ink system e.g EPFLEX-SILVER-877C+10%EPFLEX-HARDNER.

Shelf Life:

EPFLEX-INK Minimum of 24 months when product is stored between 5-25 Celsius and out of direct sunlight. In reality the only issue after or prior to 24 months will be solvent loss so EPFLX-REDUCER can be added at your desired amount.

EPFLX-HARDNER has a 12 month shelf life, this product is reactive to moisture, we recommend sealing the bottle/container immediately after use to prevent excessive airborne moisture from contacting the product.

EPIC TEAM MESSAGE:

We are available to our clients via email, phone, SKYPE or in person. We believe that our service levels, pricing and product quality are all unbeatable. Our policy is striving to offer the lowest market pricing based on our relatively low overheads and strong policy to work on below market profit margins. EPIC's pricing is to keep prices low but quality high to our clients and partners.
